Would you like to see a matching by
Option 1: minimizing the number of disappointed pairs
Option 2: minimally changing the students' preferences
Minimize disappointment
Minimal preference change
Explanation
• Student 2 listed Student 6 in the preference list.
• Student 6 listed Student 2 in the preference list.
I looked for another matching. Unfortunately, there is no such a matching.
Why no stable matching exists
• Satisfying this request would disappoint at least one other pair of students.
